The WACE Procedures Manual, which provides schools with the information to fulfil requirements of the Curriculum Council, is now available on the Council website at http://www.curriculum.wa.edu.au/internet/Communications/Publications/WACE_Procedures/.

Copies of the manual have been sent to all schools providing D and E code subjects and new WACE courses. It includes instructions for Excel, MAZE and SIS (depending on your sector/system). SIRS information has been included for all schools.

The manual has been designed to make it easy for schools to access information and insert additions and updates.

CAZ software, which developed the MAZE system, has updated its manual. It is included in the WACE Procedures Manual as appendix 3. If your school has not received through the post an updated Appendix 3 from the Council or received their first files in the past week you may need to update appendix 3. The link to update is http://www.curriculum.wa.edu.au/files/pdf/procedures_manual_08/2008_WACE_Procedures_Manual-Appendix3.pdf.

The Council has also updated the Curriculum Council contact pages in the contents section. The link to update for the contents section is http://www.curriculum.wa.edu.au/files/pdf/procedures_manual_08/2008_WACE_Procedures_Manual_coveragepage.pdf.

Excel users will want to update item 2.2.6. The link is http://www.curriculum.wa.edu.au/files/pdf/procedures_manual_08/2008_WACE_Procedures_Manual-226.pdf.
