The Curriculum Council is moving into the next stage of development of the grade descriptors in the Building and Construction course. The Council requires student work samples for this course. We hope schools teaching the existing Building and Construction subject will be able to provide samples. Teachers who may be able to help are asked to ring Guy Paragalli on the number above.

Samples are needed in:

- Design (design briefs)
- Production (pictures of student work)
  - welding (MIG, gas and electric)
  - bricklaying
  - construction
  - fabrication(Photographs which demonstrate how a student has progressed through a project would be appreciated).
- Response (student responses to questions in written or digital format).

As samples will be used in a web application, it is requested that they be provided in a digital format. Scans of student design briefs would be appreciated. If this is not possible, a photocopy of the work sample would be sufficient.

Preferably:

- scans in jpg format
- pictures in jpg format (10 x 8)
- documents in word format

A student release form (see below) must be completed before the Curriculum Council can use student work in a printed or web format.

Dear Principal

Use of assessment work in the Building and Construction for Guide to Grades

The Curriculum Council is developing the Guide to Grades. This is a teacher resource to support assessment of student achievement in the various course stages, which will be accessible on our open access website.

The Council requires assessment work to use as examples in the Guide to Grades descriptors for Building and Construction. The name of the student author and school will not be included. We request that you identify work samples and obtain the permission of students for use in the above publication.

The student is required to sign the permission slip below. We request that the school then return the slip to us with the work sample.

If you have any questions concerning this request, please telephone me on (09) 273 6337.

Yours sincerely

**DANNY McEVOY**
