Following extensive consultation, the Curriculum Council has completed the development of six VET industry specific courses. These courses will be considered for accreditation at the next Council meeting. The completed courses are:

- Automotive
- Business Services
- Community Services
- Construction
- Information Technology
- Primary Industries.

Another four courses are being developed and will be available on the Council website for consultation in September. The courses are:

- Creative Industries: Art
- Creative Industries: Media
- Hospitality
- Tourism.

The planned development of the final two courses, Creative Industries: Music and Sport and Recreation, has been deferred until 2009 as the Training Packages these courses will use are in the process of being reviewed.

The Council would like to work closely with any school planning to use VET industry specific courses in 2009. Queries about the delivery of these courses should be directed to the officers responsible. They are:
