The front covers of examination papers for each TEE subject and WACE course will soon be sent to schools for distribution through the principal to the teachers in charge of the respective course or subject. These covers provide information about the structure and mark allocation of the examination. Teachers are encouraged to familiarise their students with these covers.

In addition, a copy of the front covers for each of the eight WACE examinations will be sent directly to the relevant teacher in charge, together with a letter which confirms that the actual paper reflects the sample examination, which was sent to schools earlier this year. It will also highlight any minor format differences between the actual and sample examination.

The eight WACE courses in question are:

- Applied Information Technology
- Aviation
- Earth and Environmental Science
- Engineering Studies
- English
- English as an Additional Language or Dialect
- Media Production and Analysis
- Physical Education Studies
