Before the Curriculum Council can accept results in VET, the principal needs to ensure that documentary evidence has been received from registered training organisations (RTOs) auspicing with schools that indicates students who have completed units of competency and/or full certificates. This evidence may be email confirmation. A declaration form was sent to schools for this purpose.

To help your VET coordinator and RTO verify the accuracy of your data, the following reports can be discussed with or emailed to the RTO:

- VET units of competency achievement by provider (CSE005)
- Qualifications achieved (CSE007).

The RTO is only required to check a sample of the students' results (i.e. it is not necessary for the RTO to check every result provided for every student). Schools are also required to check a sample of the results.
