Schools are requested to return completed Year 12 student permission forms to the Curriculum Council by 7 August. The information on these forms is scanned into the SIRS database, overwriting the existing residency status and release of information fields previously populated by a school upload of the Year 12 SRGDG file.

Future Year 12 SRGDG file uploads by a school **will not** overwrite the scanned information in the release of information fields, however it will overwrite any other changes to personal information, including residency status.

Schools are requested to continue to upload their SRGDG files regularly to maintain current registrations for all of their Year 8–12 students.
