Cover pages for the 2009 TEE/WACE examinations, together with the written examinations timetable and the practical examinations timetable, will soon be sent to schools.

These cover pages should be distributed to teachers of the relevant subject/course to help prepare students for the examinations. They contain details of the structure of each examination, the allocation of marks, and the rules governing the conduct of the examination. Teachers are strongly encouraged to familiarise their students with the front covers.

In addition, individual letters for each of the WACE courses will be sent directly to the teacher-in-charge of the relevant course. The format of these examinations closely models the sample examination papers that were distributed to schools during Term 1 and is consistent with the examination design briefs.
