Teacher support materials for senior secondary courses currently on the Curriculum Council's website will only be available through the Curriculum Council extranet from Friday 7 August 2009. The extranet has been created to provide teachers with secure access to materials they can use in delivering teaching and learning programs and assessment resources.

The course support materials on the extranet will include course syllabuses, assessment support materials, sample unit packages and sample examination materials.

Teachers can access the extranet by registering through the Council website at <http://www.curriculum.wa.edu.au>.

The online professional development program for the WACE courses is also available at the Curriculum Council's online learning and support extranet.

The Council's public website will still contain course syllabuses, grade descriptor packages and WACE policy, guidelines and information.
