To guide teachers teaching the practical skills in this course and to help them prepare their students for the 2009 Physical Education Studies practical examination, the Curriculum Council is providing schools with copies of instructional DVDs that show skills and drills for each sport.

The February 2009 Circular indicated that all schools would receive full sets of the 14 DVDs. To help ensure that resources are used effectively, only DVDs needed by individual schools to teach their chosen sport/s will be sent at this time.

The DVDs are only available for the 14 sports in which an external practical examination is conducted (see list attached).

Schools are requested to use the attached form to order DVDs for the sports the school is teaching to Stage 2 or Stage 3 students. The required DVDs, along with copies of associated booklets for each sport, will be sent to the school on the receipt of the order form.

When enrolments in examinations are finalised this year and students nominate the sport for external examination, additional DVDs may be requested.
