Assessment, Review and Moderation (ARM) panels and reference groups have responded to feedback and consultation on issues related to syllabus implementation and external assessment.

Schools implementing the Music course have received a Music CD containing the music course syllabus to be implemented this year. The syllabus has been reformatted with the contexts for Stage 2 and Stage 3 now grouped together. The syllabus is available on the Council website.

Some minor modifications have been made to the requirements for the practical examination and to the area of study requirement in the Western Art Music context.

The version of the syllabus on the Council website reflects these changes.
