### Stage 1 syllabus amendment – assessment type weightings

To avoid a potential error in calculation of the assessment type weightings, Stage 1 assessment ranges on pages 8, 11 and 13 of the syllabus have been amended.

- The Production/practical assessment weighting range of 45–60 per cent is now 45–65 per cent.

### Stage 2 – System development tools

Information in Stage 2 Tools, Systems development tools on page 15 of the syllabus is insufficient. The syllabus dot point is missing reference to level 0 data flow diagrams.

The dot point should read:

- Data Flow Diagrams (context diagram, level 0, level 1 DFD with 3 to 5 processes)

### Stage 3 – System development tools

Information in Stage 2 Tools, Systems development tools on page 15 of the syllabus is insufficient. The syllabus dot point is missing reference to level 0 data flow diagrams.

The dot point should read:

- levelled Data Flow Diagrams (context diagram, level 0, level 1, DFD)

Teachers with queries should contact curriculum officer Lyn Sampson.
